Problem Statement

Streets of Medellín, Origin and Destination

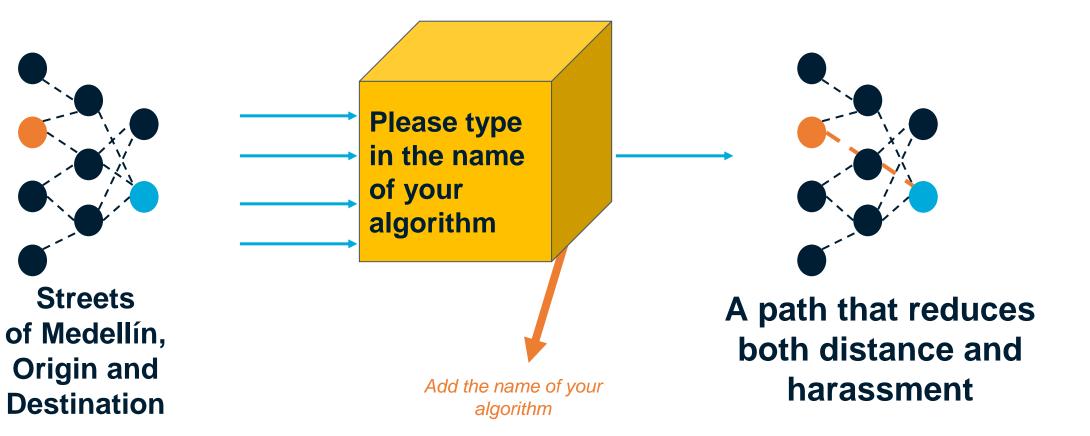

Three paths that reduce both the risk of harassment and distance

Keep this title

Do NOT use red on the slides.

 \bullet

Streets

Origin and

installment

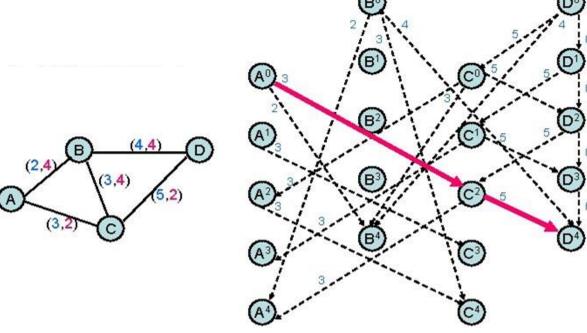

Do NOT use red on the slides.

Explanation of the algorithm

Design your own figures in Lucidchart or equivalent: https://www.lucidchart.com/

Use these colors for graphics

Name of the algorithm for the path that reduces both harassment and distance.

(In this semester, it could be DFS, BFS, Dijkstra, A*... please choose).

	Time complexity	Complexity of memory
Algorithm name	O(V ² *E*2 ^V)	O(E!*V*E*E*2 ^E)
Algorithm name (if you have tried two)	O(V*V*E*E*E)	O(E!)

Time and memory complexity of the algorithm name. V is...E is... (In this semester, it could be DFS, BFS, Dijkstra, A*). Please explain what V and E mean in this problem. PLEASE, it is not helpful to put 'n'.

Explain the tables in your own words

Create the table in Powerpoint. Do not copy pixelated screenshots of the white paper, please.

Do NOT use red on the slides.

Include a high-definition image related to the problem of sexual street harassment.

The font size must be at least 22 points.

d - 222

First path minimizing d = ???

For the third installment

Do NOT use red on the slides.

own words

Create the table in Powerpoint. Do not copy pixelated screenshots from the white paper, please.

Origin	Destination	Distance (meters)	Risk of harassment (between 0 and 1)
EAFIT University	National University	??	??

Distance and risk of harassment for the path that minimizes d = ??. Execution time of ?? seconds.

Explain the tables in your

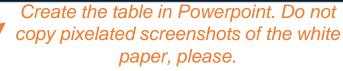

points.

Do NOT use red on the slides.

Origin	Destination	Distance (meters)	Risk of harassment (between 0 and 1)
EAFIT University	National University	??	??

Distance and risk of harassment for the path that minimizes d = ??. Execution time of ?? seconds.

Explain the tables in your

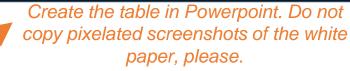

own words

Third path minimizing d = ???

Do NOT use red on the slides.

Origin	Destination	Distance (meters)	Risk of harassment (between 0 and 1)
EAFIT University	National University	??	??

Distance and risk of harassment for the path that minimizes d = ??. Execution time of ?? seconds.

Explain the tables in your

own words

Visual comparison of the three paths

Use a library to draw the map and plot the three roads between Eafit and Universidad Nacional. For example, use geopandas, pydeck or google maps.

Report accepted in OSF.IO

Do NOT use red on the slides.

Delete this slide if your report was not submitted to OSF.

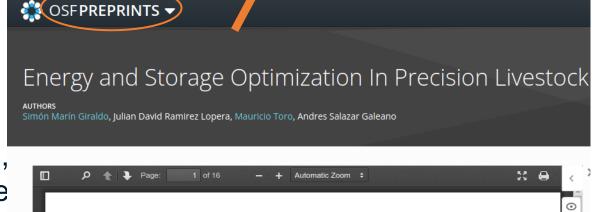

This is an example screenshot from a previous report

This is an example of a citation from a previous report

Include the report citation in OSF PREPRINTS and the link. No. not in OSF projects, it is in OSF Preprints.

Julián Ramírez, Andrés Salazar, Simón Marín, Toro. Energy Mauricio and Storage Optimization in Precision Livestock Farming. Technical Report, Universidad EAFIT, 2021. https://doi.org/10.31219/osf.io/du8yt

report on osf.io and remove the circle

ENERGY AND STORAGE OPTIMIZATION IN PRECISION LIVESTOCK FARMING

Simón Marín

ABSTRACT

Do NOT use red on the slides.

Don't forget your scholarship acknowledgements (if you have one) For others, for those who pay your tuition fees

THANK YOU!

With the support of

The first two authors were supported by the Sapiencia grant, financed by the municipality of Medellín. All authors are grateful to the Vice Rector's Office for Discovery and Creation, Universidad EAFIT, for their support in this research.

The font size must be at least 22 points.
